Homeroom Enhanced Navigation

Getting There

1. Login to Homeroom Classic (www.districtname.schooldata.net/)
   Click on the “waffle dropdown” at the top right and click on the “Homeroom Enhanced” Icon

2. Or login directly to Homeroom Enhanced with the url: www.districtname.schooldata.net/v2/homeroom Once in Homeroom Enhanced, you can likewise navigate back to Homeroom Classic via the “waffle dropdown” at the top right by clicking on “Homeroom.”
Dashboards and Associations
Once logged in, Homeroom Enhanced will attempt to associate you with a “default” dashboard based on your user role and students assigned.

The name of the dashboard you are on will be displayed at the top left.

To see the list of available dashboards, click on “My Dashboards” on the left hand navigation bar, then “All Dashboards.”

Here you can set your default by clicking on the blue “make default” button which appears when you hover your mouse to the right of the dashboard list, or click the hearts to set favorite dashboards. They will then be displayed on the “My Dashboards” dropdown list at the left.

NOTE: You can view any dashboard, but you will only see data displayed for students that you have permission to access data for. Additionally, some containers are school centric, which means if you are not assigned a school then no data will appear. For example, as a teacher, you can view any dashboard, but you will see data only for students who are in your class(es) and/or school.
**Navigation Basics**

On your dashboard, you will find various containers. Some of them will have multiple tabs that you can click on to access more available screen views.

Use the scroll bar within a container to scroll down and see further additional data, or use the far right scroll bar on the page to scroll down to see additional containers.

**Available Tools**

Notice that there are tools available in the bar at the top of each container, but these are only visible when you hover over the container with your cursor.
The following is a brief description of each of those tools.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Tool</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="move-icon.png" alt="Move Icon" /></td>
<td><strong>Move</strong></td>
<td>Click and hold this icon to “drag and drop” or rearrange the order of containers on your dashboard.</td>
</tr>
<tr>
<td><img src="maximize-icon.png" alt="Maximize Icon" /></td>
<td><strong>Maximize</strong></td>
<td>Click on this icon to quickly expand the container for a better view. Click on the resulting icon with the arrows pointed in to minimize.</td>
</tr>
<tr>
<td><img src="refresh-icon.png" alt="Refresh Icon" /></td>
<td><strong>Refresh</strong></td>
<td>If you have navigated away from the default view in your container, or changed the data settings, you can click on this icon to refresh and return the container to the default data settings.</td>
</tr>
<tr>
<td><img src="close-icon.png" alt="Close Icon" /></td>
<td><strong>Close</strong></td>
<td>If you wish to hide, or remove a container, click on this icon. See below for how to add a container back once you’ve removed it.</td>
</tr>
<tr>
<td><img src="settings-icon.png" alt="Further Options Icon" /></td>
<td><strong>Further Options</strong></td>
<td>This dropdown will give you various options based on which container you are using. You may see “show container configuration,” “split screen” or “print” options.</td>
</tr>
</tbody>
</table>
Selecting/Resizing Containers
To select which containers display, or add a container back to the dashboard once you have removed it, click on the gear icon on the top right of the dashboard. Then, you can add or remove containers by clicking on the blue checkmarks.

You can also resize a container by hovering over the lower right corner with your cursor, then drag and drop to resize.

Other things to note:
- Any changes you make to containers (sizes, order, which are displaying, etc) will be restored to defaults once you navigate away from the dashboard.
- You cannot “break” or ruin anything on the dashboards. You are in a View Only mode, so feel free to try different buttons and tools out to see what they do.
